

Technical Datasheet

MBS Green Polyester Masking Tape

Product Description

The MBS Green Polyester Tape is a single-sided 50 mu polyester green tape designed for high temperature masking in powder coating application, also used for paper splicing operations in converting industries for heat resistance splices on plastic films and siliconized paper. Excellent chemical resistance providing clean removal from components leaving no residue.

Specifications

Chemical Base	PET Silicone Adhesive Tape
Colour	Green
Total Thickness	0.085mm
Adhesive Thickness	0.050mm
Width	10mm to 520mm
Roll Length	66M
Adhesive Strength (N/25MM)	> 7.84
Maximum Temperature	250°C 10 minutes, no adhesive overflow
	200°C 120 minutes, no adhesive remained on object
Adhesive Ability	60 minutes, displacement < 3mm
Shelf life	2 years at room temperature
